

Course Outcomes

Fundamentals of Biotechnology (BT-101N)

Course Outcomes (CO)	
CO-1	Introduction to essentials of life i.e. constitution of Plant and Animal Cells and Biomolecules essential for growth and development
CO-2	Defining the basic concepts of cell division, Genetics of Blood Groups and Diabetes mellitus, Genes and Immune system
CO-3	Introduction of basic tools and techniques in Genetic Engineering and Transgenesis
CO-4	The role of Biotechnology in Agriculture, Medicine, Environment, Industry and Forensic Science. Biotechnology and Allied Fields
